I am finishing up my study of Full Stack Web Developer program at Business College Helsinki. However, I used to be a plant biotechnologist and like to do research, analysis, and problem-solving. Over time, I have realized that I like programming, data analysis and problem-solving and enjoy building web applications. So, I am changing my career from biotechnology to web development. Currently, I am looking for a job or internship place to solidify and enhance my leanings and skills.
